EDUCATION

University of California, Davis

B.S. in Computational Cognitive Science, Minor in Computer Science

- Relevant Coursework: Data Structures & Algorithms, Human-Computer Interaction, Research Methods, Statistics

Davis, California

Expected May 2027

EXPERIENCE

Aseva

Software & Administrative Intern

- Identified user pain points and information gaps through qualitative research, translating findings into structured insight deliverables that directly informed product and operational decisions across 3+ workstreams.
- Prioritized and scoped digital tool onboarding across 2-3 platforms, defining evaluation criteria, synthesizing findings, and delivering recommendations that saved the team 3+ hours per week.
- Leveraged Claude and AI tools to accelerate research, documentation, and communication workflows, improving team information accessibility by an estimated 20%.

Santa Barbara, California

May 2025 – September 2025

Apple

Specialist

- Conducted 20+ daily user need assessments, identifying friction points and behavioral patterns to surface actionable insights that informed team-level service improvements.
- Translated complex technical concepts into clear, user-centered guidance, improving first-use confidence and reducing repeat support requests across diverse customer segments.
- Chosen as Attach Pod Captain to lead cross-functional team development through peer mentorship, performance coaching, and collaboration initiatives.

Santa Barbara, California

August 2024 – Present

PROJECTS

Zaya | *TypeScript, React, Claude API, Vite* | [GitHub](#)

- Defined product requirements and prioritized features for an AI-powered Chrome extension, making scope decisions across writing assistance, summarization, and wellness based on iterative user feedback.
- Owned the full product lifecycle from ideation to deployment, establishing success metrics, running test cycles, and maintaining structured documentation of learnings to inform ongoing roadmap decisions.
- Integrated Claude and LLM APIs to power core features, applying user-centered design principles to translate technical capabilities into intuitive user experiences.

May 2025 – Present

Market Lens | *React, Financial APIs, AI Tools* | [Live Demo](#)

- Led end-to-end product development for a financial insight tool, defining the core value proposition, prioritizing features through usability testing across 3+ modules, and shipping an MVP within a single sprint.
- Conducted competitive analysis to benchmark positioning and identify feature gaps, synthesizing findings into a prioritized product roadmap targeted at beginner investors.

April 2025

Light Sculpture System | *C++, Arduino, CAD* | [GitHub](#)

- Scoped and delivered a cross-disciplinary hardware-software project, coordinating across coding, physics, and CAD design to ship a functional installation with under 50ms response latency.

April 2023

LEADERSHIP & INVOLVEMENT

Rocket & Aerospace Club

Vice President

- Coordinated communication across club members on engineering and aerospace initiatives; supported team organization, event planning, and operational logistics.

Santa Barbara, California

2024 – 2025

Muslim Student Association (MSA)

Member

- Assisted in organizing student events and community engagement initiatives, supporting collaboration and campus involvement.

University of California, Davis

May 2025 – Present

SKILLS

Product: Feature Prioritization, Product Roadmapping, User Stories, Usability Testing, Go-To-Market, Competitive Analysis

AI Tools: Claude (advanced), ChatGPT, LLM-based workflows, AI-assisted prototyping and research

Technical: Java, Python, JavaScript, TypeScript, HTML/CSS, SQL, Git, Figma
